### PROJECT:

#### DIGITAL VIDEO WATERMARKING SCHEME IN AN IOT ENVIRONMENT

Use of digital media has exploded in the past few years, primarily due to several distinct advantages that digital media can offer over analog media. These advantages include higher quality, easier editing, and perfect copying and easier and more efficient transmission over information network. The wide dissemination of digital media also creates some potential Problems. Digital images/video are often communicated or distributed over non-private

channels, such as satellite links, cable television networks, wireless networks, and the Internet. Conditional access systems for private digital image/video transmission or storage are a necessity for many applications, for example, pay-tv, confidential videoconferences, confidential facsimile transmissions, and medical image transmission and storage in a database.
